

IG Zeisigwald

With the project IG-Zeisigwald (community of interest Zeisigwald) the CoD accompanies and supports victims of real estate fraud, who were deliberately deceived in a shameless manner. Under the pretext of the tax saving and the age precaution under large temporal pressure allegedly tax-favorable dwellings were imposed as capital investment to prices of up to 500% over the market value on the damaged ones.

~

The salesmen did not stop thereby also before falsified documents. Even bank executives & notaries were and are involved in the machinations, which we try to uncover step by step. In addition, we support the fraud victims pro bono in legal, tax & organizational matters. The aim is not only to compensate the material damage but also to restore lost trust in people in general.

~

If you have been the victim of such a fraud or if you know someone who has been affected, please do not hesitate to contact us.

Animal Welfare Protection :D

Since his appearance, man has reshaped the world, sometimes without regard for losses. Losses in the area of flora & fauna, but also our fellow inhabitants. Animals have an older right to exist, only they can not raise their voices. Thus, man is constantly reducing the habitat of our animal relatives. In addition, despite more effective possibilities in research, animal experiments are still used, although the validity of any studies is doubtful in many cases.

~

We advocate and promote the protection of the environment & animals. Humans could learn from a multitude of fascinating creatures if only they would listen to them. For this reason we support the initiative "Tierschutzverein-Düsseldorf", which cares for injured animals 24 hours, 365 days a year on a voluntary basis.

~

More information about the work of the association as well as possibilities to support this you receive under the following link.

Back 2 Life

Back 2 Life is an initiative that offers people a way out of their addiction to meaning. Unfortunately, a large number of different sects also exist in Germany. Many of them are far less well known than Scientology or the Jehovah's Witnesses, and for that very reason no less dangerous, since there is a consequent lack of education.

~

We offer therapeutic accompaniment and especially an alternative, new environment. Often family and

acquaintance relationships are neglected or broken off, contacts outside the sect are frowned upon or even forbidden. The individual counts for nothing, only the collective and the "guru" can avert or survive the approaching apocalypse.

~

Thus or similarly, young people in particular are indoctrinated at an early age and deprived of their opportunities for development. Severe psychological ailments such as bulimia, AHDS & depression, up to schizophrenia are the consequences of targeted manipulation. Often profane greed for profit is in the background of the actions of such movements. We show affected people alternatives, strengthen their self-confidence & place them back into work. New spheres of activity are the beginning of a reintegration into society.
